

MODULE · FLEET MANAGEMENT

# Fleet Management.

One console for trips, attendance, maintenance, challans, driver earnings and MIS — with a field-ready Ops App for every on-ground manager, driver and technician.

Trucking, taxi, mobility or corporate fleets — run every vehicle and every rupee from one operating system, with photo-backed QC and an auditable paper trail.

## FLEET OPERATORS

Taxi, mobility & corporate fleets

## TRUCKING

Long-haul, last-mile & intra-city

## SERVICE CENTERS

Workshops running maintenance standalone

Trip & Route

Maintenance

Challan · mParivahan

Driver Earnings

Vehicle QC

MIS & SLA

## PROBLEM IT SOLVES

- ✗ Vehicle docs & challans tracked on WhatsApp
- ✗ Maintenance raised verbally; quotations disputed later
- ✗ Driver earnings & attendance reconciled on paper
- ✗ QC & MIS reports arrive too late to act on
- ✗ No single view of vehicle utilisation or cost per km

## HOW HYPERION FIXES IT

- ✓ One ledger for every vehicle, driver and ticket
- ✓ Ticket → quotation → work → close, fully auditable
- ✓ Attendance & earnings auto-settled via Ops App
- ✓ Live MIS with photo-backed vehicle QC
- ✓ Utilisation, cost per km, SLA — visible in real time

FEATURES & STAKEHOLDERS

# Every fleet capability on one operating console.

Twelve capability blocks covering the full fleet lifecycle — vehicle & driver master, trips, maintenance, challans, earnings, QC and MIS.

**F.01**

## Vehicle Master

Docs, expiries, ownership, insurance, PUC, fitness.

**F.02**

## Driver Master

KYC, licence, badge, attendance, earnings, ratings.

**F.03**

## Trip & Route

Trip logs with fuel, tolls, odometer & POD.

**F.04**

## Maintenance Tickets

Raise, approve, assign, close — with parts & labour.

**F.05**

## Quotations

Quotes raised directly from tickets; customer e-sign.

**F.06**

## Challan Sync

mParivahan + DigiLocker sync; dispute & pay workflow.

**F.07**

## Vehicle QC

Photo-backed pre/post checks with defect codes.

**F.08**

## Attendance

Geo-fenced clock-in, shifts, leave, over-time.

**F.09**

## Earnings Engine

Per-trip, per-km, per-day rules with incentives.

**F.10**

## Workshop Mode

Service centers run maintenance standalone if needed.

**F.11**

## Ops App

Field-ready Android/iOS app for managers & drivers.

**F.12**

## MIS & Reports

Utilisation, cost/km, SLA, downtime, P&L per vehicle.

## Fleet Manager

Live board, SLA, exceptions, approvals

## Drivers & Crew

Trips, attendance, earnings, QC

## Workshop / Tech

Tickets, quotations, parts, closure

## Finance & MIS

Cost per km, settlements, reports

## WORKS WITH

mParivahan

DigiLocker

FASTag

Razorpay

Tally

Zoho

mParivahan + DigiLocker for vehicle documents & challans. FASTag feeds for toll reconciliation. Razorpay for driver payouts & customer collections. Two-way sync to Tally or Zoho for finance.

## PILOT AT A GLANCE

|            |                               |
|------------|-------------------------------|
| Deployment | Cloud · on-prem optional      |
| Setup time | 2–3 weeks                     |
| Go-live    | Week 4–6                      |
| Ops App    | Android · iOS · offline-first |
| Docs       | mParivahan · DigiLocker       |
