

MODULE · INVENTORY MANAGEMENT

Inventory Management.

One real-time stock ledger across every warehouse, store, marketplace and D2C channel — with batch, serial, expiry, landed cost and a reorder engine your finance team will actually trust.

Stop reconciling stock at midnight. Hyperion Inventory sits beside your ERP, not on top — additive, not disruptive.

D2C BRANDS

Own web + marketplaces + offline stores

DISTRIBUTORS

FMCG, pharma & industrial SKUs

OEMS & TRADERS

Serialised inventory, BOMs & kits

Multi-node ledger

Batch · Serial · Expiry

Reorder engine

Landed cost

Dead stock

Reconciliation

PROBLEM IT SOLVES

- ✗ Four systems, four stock numbers, none agree at close
- ✗ Marketplaces oversell — reservations aren't synced
- ✗ Expiries & slow-movers discovered only at audit
- ✗ Landed cost & COGS fudged at month-end
- ✗ Reorder is a gut-feel call by one senior planner

HOW HYPERION FIXES IT

- ✓ One authoritative ledger every channel sees
- ✓ Real-time reservations across channels → zero oversell
- ✓ Expiry alerts 90 days out; proactive markdowns
- ✓ Batch-accurate landed cost, COGS & margin per SKU
- ✓ Auto-draft POs from ROP, lead time & vendor score

FEATURES & STAKEHOLDERS

Everything you need to trust your stock number.

Twelve capability blocks covering SKU master, multi-node ledger, reorder, batch/serial, landed cost, transfers, dead-stock, reconciliation and channel sync.

F.01

SKU & Variants

Parents, variants, kits, bundles, BOMs, substitutions.

F.02

Multi-node Ledger

On-hand, reserved, in-transit, damaged, held — live.

F.03

Channel Reservations

Stock held per marketplace, auto-release on cancel.

F.04

Reorder Engine

ROP, ROQ, safety stock, lead-time variance, draft POs.

F.05

Batch & Serial

Batch, lot, MRP, serial with FEFO / FIFO / LIFO picks.

F.06

Landed Cost

Freight, duty, insurance amortised per batch.

F.07

Transfers / STO

Inter-node transfers with in-transit ledger & GRN.

F.08

Dead Stock & Ageing

ABC-XYZ classification, markdowns, write-offs.

F.09

Cycle Counts

Daily, blind, surprise counts with variance trail.

F.10

Reconciliation

Maker-checker, journal drafts, audit trail.

F.11

Alerts & Rules

Low-stock, over-stock, expiry, negative stock alerts.

F.12

ERP & Channel Sync

SAP, Oracle, Tally, Zoho, Shopify, Amazon, Flipkart.

Inventory Controller

Live stock, variance queue, cycle counts

Demand Planner

ROP/ROQ, lead-time analytics, forecasts

Finance & Audit

Landed cost, COGS, valuation, close

Channel Ops

Reservation feeds, oversell protection

INTEGRATIONS

EasyEcom

Unicommerce

Shopify

SAP

Oracle

Tally

Zoho

Multi-channel OMS connectors (EasyEcom, Unicommerce) and native Shopify for D2C stock feeds. Two-way sync with SAP, Oracle, Tally and Zoho for journals, valuation and COGS.

PILOT AT A GLANCE

Setup time	2–3 weeks
Target accuracy	> 99%
Target oversell	< 0.1%
ERP sync	SAP · Oracle · Tally · Zoho
Channels	Shopify · Amazon · Flipkart · Unicommerce
