

MODULE · ORDER & DELIVERY MANAGEMENT

Order & Delivery Management.

The entire delivery stack — order intake, promise logic, mode routing, dispatch, rider app, returns & QC, couriers and settlement — on one console.

On-demand. Slot-based scheduled. Quick-commerce. Try & Buy. Configured per tenant, per category, per pincode. Couriers and marketplace OMS built in.

APPAREL & FOOTWEAR

Try & Buy first, doorstep trial slots

GROCERY / PHARMACY

Slot + Quick-com toggle per pincode

MARKETPLACES / 3PL

Multi-brand last-mile with tenant rules

On-demand

Slot-based

Quick-commerce

Try & Buy

Returns QC

Rider App

PROBLEM IT SOLVES

- ✗ One delivery mode — customer experience is a lottery
- ✗ Slots promised without capacity checks
- ✗ Quick-commerce bolted on with spreadsheets
- ✗ Try & Buy runs on WhatsApp & tribal knowledge
- ✗ Returns accepted without QC; damages absorbed

HOW HYPERION FIXES IT

- ✓ Four delivery modes — per category, per pincode
- ✓ Capacity-aware slot engine with blackout & buffer
- ✓ Quick-commerce flips on with a single tenant switch
- ✓ Try & Buy fully tracked — OTP, photo, per-SKU
- ✓ Return QC reports — damage never silently absorbed

FEATURES & STAKEHOLDERS

The whole delivery stack — order intake to settlement.

Twelve capability blocks: order intake, mode routing, slot engine, dispatch console, rider app, customer tracking, returns, QC, COD recon, couriers and marketplace sync.

F.01

Order Intake
